### DLT VS RACK TECHNOLOGY

As the amount of data requiring backup increases, the need for precious data center space has become critical. Packing performance and capacity into a cost-effective rack optimized tape backup solution, Mast Storage DLT VS Rack provides space for one or two half-high SCSI tape drives in under 1.75" (1U) of precious rack space.

With 2 SCSI ports, both drives can run in parallel, reducing the backup time for multiple server environments, or attach 2 drives to a single server to deliver exceptional performance.

Installation is as simple as taking the DLT VS Rack out of the box and mounting it into your rack.

For a rack-optimized, cost-effective, reliable, high-capacity solution, the DLT VS Rack is the unsurpassed choice.
